service, and is confident that our in-house project team can offer value-added services to successfully complete these environmental services while meeting critical deadlines and remaining within specific budget estimates.

SCOPE OF WORK

Based on the information provided in the task order solicitation, UltraSystems can provide these environmental services. Our budget for scope of work is provided in **Table 2**. Budget for Scope of Work.

Table 1
Budget for Scope of Work

Task	Description	Cost
1	<p>Pre-construction Survey: UltraSystems' staff biologists will perform nesting bird survey and regulated species 7 days prior to construction activities. The surveys will be conducted for all proposed project impact areas and an additional 500 foot radius (of accessible areas).</p> <p>Observations will include: (1) detailed observations and locations of regulated species observed; (2) a statement that no regulated species were observed; or (3) a statement that regulated species, which were not originally anticipated by the project or listed in the project specification, were present in a 500-foot buffer around the project site.</p> <p>This task assumes up to 1.5 days for the pre-construction surveys, to be used in any combination as field conditions dictate. Any nesting locations would be marked and nesting bird buffer zones (200 - 500 ft) established, prior to any construction beginning.</p> <p>A field monitoring log, photo documentation, and nesting bird location figure will be provided following the pre-construction survey.</p> <p><i>Includes up to 1.5 days of regulated species pre-construction survey work, drive time, and preparation of daily monitoring log/figure.</i></p>	\$2,560
2	<p>Pre-construction Survey Report: Following completion of the pre-construction nesting bird, a UltraSystems will prepare a pre-construction report. The report will summarize information regarding the natural history, the habitat of the BSA and its suitability for nesting migratory birds, and bat species. The report will include methods and results of the field surveys, figures, and site photographs. The report will be submitted 14 days before starting construction.</p> <p>Deliverables: (1) One electronic copy of the draft and final Pre-construction Survey Report to the Client, and (2) One hard copy of the final Pre-construction Survey Report to the Contractor.</p>	\$4,340
3	<p>Construction Monitoring (daily): This task presumes that daily monitoring is required by one Contractor-supplied biologist, should the biologist discover nesting birds or other regulated species. UltraSystems will provide a Monitoring Biologist to monitor conditions of approval set forth in the project permits and environmental guidance documents during project activities.</p> <p>The Contract Supplied Biologist will work with the Contractor to advise and instruct where the temporary high-visibility fence around the work limits of the project is required, in any special environmentally sensitive areas.</p>	\$56,480

Task	Description	Cost
	<p>A daily monitoring log, photo documentation, biological resources location and survey figure, and recommendations will be provided daily and e-mail notifications will detail biological resources as discovered on a daily basis.</p> <p>The biological monitor will provide as-needed worker's education awareness program training to new staff and/or to notify crew members of sensitive biological resources associated with the project.</p> <p>The monitor will submit observations of covered species to the California Natural Diversity Database (CNDDB).</p> <p><i>Construction is estimated to be 55 working days.</i> <i>Biologist will be working 10 hours/per day.</i> <i>One monitoring biologists onsite at any time there are work activities.</i> <i>550 monitoring hrs., based on 55 days of construction</i></p>	
4	<p>Worker's Environmental Awareness Program (WEAP): UltraSystems will prepare a WEAP specific to the project. The WEAP will educate on-site workers about sensitive environmental issues associated with the project. The WEAP will be administered all on-site personnel, contractors, and all subcontractors, prior to the any work commencing on the site.</p> <p>The WEAP will include but not will be limited to protected species that have potential to occur within the project site, including nesting birds, plants, and other wildlife species and protection measures, listed in the species protection or in PLACs.</p> <p>This WEAP cost includes a handout to each attendee.</p>	\$5,070
5	<p>Final Monitoring Report: UltraSystems will compile a Final Monitoring Report to be submitted no later than 20 days after completion of the project.</p> <p>The report shall include at a minimum, construction start and end dates, project impacts on regulated species, species protection measures and implementation details, incidental take information, an assessment of the effectiveness of the protection measures in mitigating project impacts, and recommendations for improving species protection measures.</p> <p>Deliverables:</p> <ul style="list-style-type: none"> •One electronic copy of the draft and Final Monitoring Report to the Client. •One hard copy of the Final Monitoring Report to the Client. •One hard copy of the Final Monitoring Report to CDFW. 	\$7,300
6	<p>Agency Consultation: UltraSystems will provide agency consultation, compliance strategies, and reporting to the natural resource agencies including the CDFW and USFS in the event a special-status species is found during the pre-construction surveys. Agency consultation also includes the preparation of up to two nesting bird variance requests for reduced nesting bird buffer zone from USFWS.</p> <p><i>Allows for up to 24 hours of consultation and reporting by an UltraSystems Senior Biologist to natural resource agencies.</i></p>	\$2,080
7	<p>Project Management: This task provides as-needed coordination for management of survey and monitoring procedures, onsite findings, scheduling, and client coordination. Responses to e-mails, phone calls, comments, and other inquiries will be addressed as part of this task. An UltraSystems' Senior Biologist will attend an initial kickoff meeting to introduce staff, establish appropriate channels for communication, and inspect the site. This task only includes this one kickoff meeting.</p>	\$6,000

Task	Description	Cost
	TOTAL FEE	\$83,830

ASSUMPTIONS AND LIMITATIONS

- This proposal represents UltraSystems' understanding of the proposed project at this time. Changes to project design or scope will require a renegotiation of the approved scope of work. Similarly, additional requests made by the client or resource agencies will require a change order and/or will be billed on a time & materials basis.
- Additional monitoring and reporting beyond that contemplated above may be required by the natural resource permits issued by the California Department of Fish and Wildlife, and the Regional Water Quality Control Board respectively.
- None of the options include protocol surveys, but does allow for consultation for the waiver of surveys if species were not observed during any survey at this location.
- Surveys will not be conducted outside of the BSA.
- UltraSystems' personnel have not visited the project site to determine existing setting. Instead, review of aerial imagery and existing documents was completed to determine survey needs. This proposal presumes that the minimal amount of survey will be necessary to meet environmental compliance. Additional survey needs may arise as additional information about the project is obtained.
- This proposal includes only one initial kickoff meeting with construction crews and agency personnel. It is assumed that no other meetings will be scheduled for the duration of the project.
- If field work is interrupted by weather or other circumstances beyond control, additional survey dates and travel costs may be incurred.
- Changes in the project description, project boundary, and project footprint (design) could trigger additional analyses, calculations, resubmittals and/or revisions to the report and/or figures. These additional actions will be billed on a time and materials basis or a change order will be required.
- Surveys would be performed concurrently if protocols permit.
- In order to facilitate the project for mapping purposes, the client will provide UltraSystems CAD data with a defined coordinate system or GIS shapefiles/geodatabase or Google Earth kmz/kml files that digitally illustrate the project boundary and project footprint (permanent and temporary impacts). If digital data is provided without a defined coordinate system or as static graphics (i.e. pdf, jpg, etc.), which require georeferencing, then a change order will be requested for mapping and conversion of data into a GIS compatible format.

- Permit processing, resource agency consultations, responding to agency comments on the report, and site visits with the resource agencies are not a part of this proposal. Additional requests from regulatory agencies will be billed on a time and materials basis and/or a change order must be fulfilled.
- The estimated costs provided in this proposal reflect a standard project without unnecessary delays. The Client agrees to fulfill data needs requests in a timely fashion.
- Each draft report will be electronically submitted to the Client within 30 days of completion of the specific survey. Comments will be provided by the Client on the draft report within two weeks of submittal. UltraSystems will respond to one set of consolidated comments on the draft report from the Client and finalize the report within two weeks of receiving the Client's comments. The Client will consolidate comments from multiple reviewers. This proposal includes one revision of a report after receiving one set of consolidated comments from the Client. Responding to additional rounds of comments and making additional revisions and resubmittals to the report and/or figures would require a change order.

ESTIMATED COSTS

The total costs provided in **Table 2** will not be exceeded without your expressed authorization.

Should you have any questions regarding the proposed scope of work or costs, please contact either the undersigned blindsay@ultrasystems.com, 949/788-4900 x227 at your convenience.
